

Wireless Noise Monitoring System

For Baseline, Boundary Noise Study and Construction Noise Monitoring

OST Noise Monitoring System is an NEA approved vendor for supplying the wireless noise monitoring system for industrial and construction projects in Singapore. We have developed our own IoT platform for our all-purpose monitoring system cloud based platform for different types of smart sensors using for construction site.

We provide customers with the ability and convenience to self-monitor the construction site activity 24/7 via webpage to get **REALTIME** site noise level data. This will enable operation to make immediate adjustments if noise level exit the maximum permissible level.

OST Noise monitoring solution equips your business with the following capabilities:

- ✓ **Wireless data transmission**
Get **LIVE** noise levels from everywhere with an internet connection;
- ✓ **24/7 web-based monitoring**
Real time noise monitoring readings with user and password protected;
- ✓ **Easy to use**
Learn the program in just a minutes;
- ✓ **Online Integrated view**
Provides integrated information with reference to the legal requirements;
- ✓ **Real-time SMS and Email alerts**
SMS and email alerts send to the designated personnel;
- ✓ **Latest technologies**
Advanced high efficiency **GREEN** energy management system in our measuring system to conserve power usage via solar energy.
